Prehospital care is a growing area in medicine, and emergency treatments are becoming more sophisticated as the potential to save lives grow. The fourth edition of this ABC has been thoroughly updated and includes new chapters on nuclear and biological emergencies. Each chapter gives concise and clear guidance and is accompanied by excellent photographs and diagrams. Edited and written by leading UK trauma authorities, this is a truly comprehensive and practical book for everyday use by emergency medicine staff, nurses, hospital doctors, paramedics, and ambulance services
