

Afirmaciones aparentes en el español de Venezuela [

2020

text (article)

Analítica

The purpose of this work is to demonstrate the existence of affirmative expressions in Venezuelan Spanish which may convey a negative meaning when used in certain contexts. This proves that the inclusion of such context is indispensable for a deeper analysis. On the other hand, it is paramount to point out that this paper is based on two theoretical constructs under the interpretative paradigm. The first is that of apparent negations formulated by van Dijk (1994); the second is based on a research article of ours in which we propose and support a new classification of modal sentences: affirmative and negative. Two techniques were used to elaborate the corpus: in-depth interview and participant observation. For the interpretation of said corpus, the triangulation, categorization and theorization strategies were employed in order to generate an ad hoc hermeneusis
