

Ajustar y adaptar: acciones para elevar la satisfacción en continuidad escolar en pandemia [

2022

text (article)

Analítica

COVID-19 was marked in Venezuela by three moments in which the educational modality varied. In the Venezuelan educational context, there was face-to-face attendance until March 13, asynchronous distance education from March 16 to July 23 and synchronous virtual education, from September 7 to December 18. Educational actors had to adapt to these changes. The objective of this study was to recognize the balance between the variables of organization-person fit and person-organization adaptation as keys to the maintenance of job satisfaction in administrative and teaching staff in the Venezuelan educational context. The methodology is based on the quantitative approach, in a descriptive level field design with the application of a previously validated instrument whose results were subjected to statistical analysis. The findings show a significant increase between the first and second measurement of the variable: organization-person fit and a decrease in the constructs, person-organization adaptation and employee satisfaction. It was confirmed that staff satisfaction is more related to person-organization adaptation than to organization-person fit. Four strategies were recommended to increase that satisfaction

COVID-19 was marked in Venezuela by three moments in which the educational modality varied.
