Monografía

""All families and genera": Exploring the Corpus of English life sciences texts aims at exploring scientific writing in late modern English. This volume is the fourth of its kind devoted to the analysis of the relations between language and different scientific disciplines from 1700 to 1900. Here, forty texts on biology and related fields as compiled in the Corpus of English life sciences texts (CELiST) constitute the basis for the fifteen studies describing scientific discourse on both methodological issues, the period and the status of the discipline itself as well as pilot studies. CELiST is accompanied by an updated version of the Coruña Corpus Tool (CCT), a purpose-designed software. Both the tool and the corpus are freely accessible at the Repositorio Universidade Coruña: CCT at <http://hdl.handle.net/2183/21850> and CELiST at <https://ruc.udc.es/dspace/handle/2183/25720> (DOI: <https://doi.org/10.17979/spudc.9788497497848>). The book is addressed to an international readership. It is of interest for university libraries as well as other academic institutions/societies and individual scholars specialised in corpus linguistics and historical linguistics all over the world"--
