Título: Professional SharePoint 2010 development Tom Rizzo [and others]

Edición: 2nd ed

Editorial: Indianapolis Wiley Pub. 2012

Descripción física: 1 online resource (xxviii, 811 pages) color illustrations

Mención de serie: Wrox professional guides

Bibliografía: Includes bibliographical references and index

Contenido: Machine generated contents note:) ch. 1) Introduction To Sharepoint 2010 -- What's New in the SharePoint Platform and Tools -- Language Integrated Query -- List Enhancements -- Business Connectivity Services -- Silverlight Integration -- Client-Side OM -- Web 2.0 Protocols and New Standards -- Sandbox Solutions and Resource Governors -- SharePoint Designer -- Visio and Access Services -- InfoPath (Forms, List Forms, Mobile Forms) -- Visual Studio -- Web Solution Packages -- Developer Dashboard -- What's New in Collaboration /Social Computing -- Enhanced Blogs and Wikis -- Social Tagging and Ratings -- Activity Feeds -- Social Bookmarking -- Organization Browser -- Outlook Social Newsfeeds and Expertise -- Mobile Client -- Social Search -- What's New in Search -- New Core Search Query Capabilities -- Enhanced Core Search Results -- Enhanced People Search: Phonetics -- Enhanced People Search: Address Book-Style Lookups -- Enhanced People Search Results -- New Search Connector Framework -- FAST Integration -- What's New in Enterprise Content Management -- Document Management -- Records Management -- Web Content Management -- Digital Asset Management -- Workflow -- What's New in Forms -- What's New in Groove (SharePoint Workspace) -- What's New in Cloud Services -- Summary -- ch. 2) Developer Tools For Sharepoint 2010 -- OOB Developer Experience -- Understanding SharePoint Designer 2010 -- New User Interface -- Top Ten New Features in SPD -- Understanding Visual Studio 2010 Tools -- Importing WSPs -- SharePoint Server Explorer -- Solution Explorer Integration -- Feature Designer -- Package Designer and Explorer -- Project Type Templates -- Mapping Folders -- Setting Up Your Development Environment -- System Requirements -- Troubleshooting with Debugging and Testing -- F5 Debugging -- Debugging Using the Developer Dashboard -- Debugging Using SharePoint Logs --

Debugging Silverlight Code -- Unit, Capacity, and Load Testing -- Other Useful Tools for Debugging and Testing
-- Deploying and Maintaining Your Code -- Customizing Deployment in VS -- ALM with VS 2010 and SharePoint
-- New in VS 2010 Service Pack 1: IntelliTrace and Unit Testing -- Moving from Test to Production -- Upgrading
Code from 2007 -- Summary -- ch. 3) It Pro Enhancements For The Developer -- Performance Improvements --
List Throttling -- External List Throttling -- HTTP Request Throttling -- Remote Blob Storage -- Streaming Media
and Bit Rate Throttling -- High-Availability Improvements -- Database Mirroring and Clustering -- Read-Only
Databases -- Security Improvements in SharePoint 2010 -- Claims-Based Authentication -- Code Access Security --
Sandbox Solutions -- Cross-Site Scripting -- Management Improvements -- Health Monitoring and Reports --
Service Applications -- PowerShell Support -- Summary -- ch. 4) Sharepoint Platform -- Platform Overview -- New
User Interface -- General Platform Improvements -- Master Pages and _Layouts -- Ribbon -- Status Bar and
Notification Area -- Working with Dialogs -- Theming Infrastructure -- List, View, and Event Enhancements -- List
Enhancements -- View Enhancements -- Events Enhancements -- Overview of Data Technologies -- SharePoint
LINQ Support -- Managed Client OM -- jQuery and SharePoint -- Timer Service Applications -- Sandbox
Solutions -- Types of Solutions You Can Build -- Executing Code in the Sandbox -- Solution Monitoring --
Managing Solutions -- Mobile Solutions -- Writing a SharePoint Mobile Adapter -- Safe Controls and Editing the
Compat. Browser File -- Creating a Windows Phone 7 Application -- Summary -- ch. 5) Collaboration And Social
Computing -- People-Centricity -- User Profile Service Application -- Profile Synchronization -- Social Networking
and My Site -- Social Tagging and Ratings -- Blogs and Wiki Site Definitions -- Summary -- ch. 6) Search --
Search Options with SharePoint 2010 -- SharePoint Foundation -- Search Server 2010 Express -- Search Server
2010 -- SharePoint Server 2010 -- FAST Search Server 2010 for SharePoint -- Choosing the Right Search Product
-- Common Platform and APIs -- Search User Experience -- Search Center -- Visual Cues in Search Results --
"Conversational" Search -- People Search -- Search Architecture and Topologies -- SharePoint Search Key
Components -- FAST Architecture and Topology -- Scale Out with FAST -- How Architecture Meets Applications
-- Developing with Enterprise Search -- Range of Customization -- Top Customization Scenarios -- Search-Driven
Applications -- Customizing the Search User Experience -- Example: New Core Results Web Part -- Example:
Adding Sorting to Your New Web Part -- Web Parts with FAST -- Search Connectors and Searching LOB Systems
-- Using Out-of-Box Connectors -- Creating Indexing Connectors -- Deploying Connectors -- Summary --
Customizing Connectivity -- Working with Federation -- Customization Examples Using Federation -- Further
Considerations in Federation -- Working with the Query OM -- Query-Side APIs and OM -- Query Syntax --
FAST Query Language (FQL) -- Examples Using Query Customization -- Social Search -- End-User-Visible
Functionality -- Social Search Architecture -- Content Enhancement -- Metadata, Linguistics, and Search --
Advanced Content Processing with FAST -- Multilingual Search -- Extending Search Using the Administrative OM
-- Authentication and Security -- Search Reports -- Combining Search with Other Workloads -- Search and Content
-- Search and Insights -- Search and Composites -- Search and Communities -- Combining Search with Other
Features -- Search and the Cloud -- Search Capabilities in Office 365 -- Combining On-premises and In-cloud
Content with Search -- Summary -- ch. 7) Records Management -- SharePoint 2010 Records Management
Overview -- Recordization -- eDiscovery and Holds -- Auditing and Reporting -- Programming RM in SharePoint
-- Declaring and Undeclaring a Record -- Creating Retention Schedules -- Creating Organizer Rules -- Creating
Workflows that Use RM -- Summary -- ch. 8) Web Content Management -- Content Lifecycle in Web Content
Management -- Separation of Content and Development -- Important Role of Information Architecture --
Foundations of Web Content Management -- Activating the Publishing Features -- Publishing Feature Components
-- Page Processing Model -- Site Variations -- Preparing for Variations -- Creating Variations -- Site Columns --
Browser-Based Site Column Development -- Feature-Based Site Column Development -- Object Model-Based Site
Column Development -- Content Types -- Understanding Content Type IDs -- Browser-Based Content Type
Development -- Feature-Based Content Type Development -- Object Model-Based Content Type Development --
Client Object Model-Based Content Type Development -- Page Layouts -- Developing Page Layouts -- Creating a
Page Layout with SharePoint Designer -- Create a Page Layout with Visual Studio -- Master Pages -- Creating a
Master Page with SharePoint Designer -- Creating a Master Page with Visual Studio -- Setting the Master Page in
Code -- Navigation -- Customizing Navigation with Site Settings -- Implementing Navigation in the Master Page --
Customizing Navigation Using the Object Model -- Customizing Navigation with Web Parts -- Content by Query
Web Part -- Using the Content by Query Web Part -- Customizing Content by Query Web Part in XML -- Using
Custom XSL to Modify the Presentation of Content -- Redeploying the Content by Query Web Part Using Visual
Studio -- Content Conversion -- Setting Up Document Conversion -- Using Document Conversion -- Summary --

ch. 9) Electronic Forms -- Introducing the Training Management Application -- Customizing SharePoint List Forms -- Creating the Trainings List -- Customizing SharePoint List Forms -- Adding Intelligence Using Rules and Views -- Publishing List Forms -- Distributing the Trainings List -- Designing InfoPath Form Templates -- What Is a Form Library? -- Designing Your Form Template -- Querying SharePoint Lists in Forms -- Querying REST Web Services -- Submit Behavior -- Form Programming -- Publishing an InfoPath Form -- Publishing to a Form Library vs Publishing to a Content Type -- Form Security -- Sandboxing Your Forms -- Form Anatomy -- Extracting the Form's Data -- Tools for Form Developers -- Rule Inspector -- Design Checker -- IE Developer Tools -- Fiddler Tool -- Tiny Inline Tools -- Building Web Parts Using InfoPath -- InfoPath Form Web Part -- Using InfoPath to Create Connected Web Parts -- Getting Data from Other Web Parts -- Empowering Users with Mashups -- Summary -- ch. 10) ECM: Document Management -- New Enterprise Content Mindset -- New ECM Features -- Expanded ECM Object Model -- Getting the Most Out of the Document Center -- Visual Studio and the Document Center -- Content Routing -- Managing the Content Organizer -- Using Document Libraries in the Document Center -- Metadata Navigation and Filtering -- Visual Studio and Document Libraries -- Managed Metadata -- Types of Metadata -- Managed Metadata Service Application -- Content Types -- Document ID Service -- Create a Custom Document ID Provider -- Summary -- ch. 11) Introducing Business Connectivity Services -- Introducing Business Connectivity Services -- Creating Simple BCS Solutions -- Understanding BCS Architecture -- Understanding Connectors -- Understanding Business Data Connectivity Note continued:) Understanding the Secure Store Service -- Understanding Package Deployment -- Working with BDC Metadata Models -- Working with External Datasources -- Connecting with the SQL Server Connector -- Connecting with the WCF Service Connector -- Creating Methods -- Implementing Method Stereotypes -- Creating Methods for Databases -- Creating Methods for Web Services -- Defining Associations -- Working with External Lists -- Creating Custom List Actions -- Creating Custom Forms -- Summary -- ch. 12) Advanced Business Connectivity Services -- Creating .NET Assembly Connectors -- Understanding the Project Tooling -- Walking Through the Development Process -- Packaging Considerations -- Enabling Search Support -- Working with the BDC Server Runtime Object Model -- Connecting to the Metadata Catalog -- Retrieving Model Elements -- Executing Operations -- Summary -- ch. 13) Workflow -- Training Approval Workflow -- Creating the Training Content Type -- Workflow Development Lifecycle -- Prototyping in Visio -- Customizing the Workflow in SharePoint Designer -- Creating Custom Actions with Visual Studio 2010 -- Importing to Visual Studio 2010 -- Building Workflows with Visual Studio 2010 -- Site Workflows -- Pluggable Workflow Services -- Tapping into Workflow Events -- Summary -- ch. 14) Business Intelligence -- Challenges with Traditional Business Intelligence -- Integration with SharePoint: The History -- Highlights of Business Intelligence in SharePoint Server 2010 -- Important BI Terms and Concepts -- Using the AdventureWorks Sample Databases -- Starting Point: Business Intelligence Center -- Excel Services -- Excel Services Architecture -- Office Data Connection -- Authoring Workbooks in Excel -- Publishing the Workbook -- PerformancePoint Services -- Dashboard versus Scorecard -- PerformancePoint Services Architecture -- Introducing Dashboard Designer -- Creating Your First Dashboard -- One-Click Publishing to SharePoint -- Time Intelligence Filtering -- Reporting Services 2008 R2 -- Integration Modes -- Local Mode Architecture -- Connected Mode Architecture -- Configuring the BI Center -- BIDS 2008 R2 or Report Builder 3.0? -- Building and Deploying Reports -- Caching and Snapshots -- Reporting on SharePoint Data -- Claims and BI Solutions -- Summary -- ch. 15) Sharepoint Online -- BPOS: SharePoint Online Overview -- Developing in the Cloud -- Debugging Your Solutions -- Example Cloud Scenarios -- Office 365 Overview -- Differences Between SharePoint On-Premises and Online -- What's in SharePoint Online in Office 365 -- What About Hybrid Solutions? -- Azure Overview -- Windows Azure -- SQL Azure -- SQL Server Management Studio -- Windows Azure AppFabric -- Windows Azure Virtual Network -- Developer Tools for Windows Azure -- SharePoint and Azure Integration Scenarios -- Integrating SQL Azure with SharePoint On-Premises -- Integrating SQL Azure and SharePoint Online -- Connecting to On-Premises from SharePoint Online -- Writing SharePoint Online Applications -- Identity and Authentication in Office 365 -- Calling the Client Object Model -- Writing a Sandbox Solution in Office 365 -- Connecting Outside of Office 365 with Silverlight -- Deploying and Debugging -- Summary
