

"Tribal Peoples for Tomorrow's world" by Stephen Corry, 2014 [

2017

text (article)

Analítica

This review aims to comment the content of the publication "Tribal Peoples for Tomorrow's World" by Stephen Corry through a critical view and academic perspective. The knowledge of indigenous groups is of vital need in the South and Central American context because of the important amount of indigenous population that lives in these countries. Only in Peru, four million indigenous people were counted in the last national census. Stephen Corry's book is relevant because it provides a general outlook about the history and contemporary problematic of indigenous people and tribes. However, the lack of references to lay the foundations of his arguments is noticeable, making them seem superficial, extremely general and subjective in occasions. Even so, this book might prove to be a rich starting point for those who are interested in knowing more about indigenous people, using it as a non-academic guide and reference material on general culture about the subject. It is written in simple, emotive style, easy to read and with potential to contribute to the propagation of knowledge about these human groups and their past and present quandry, which is not unrelated to those of other human groups
