

Análisis situacional de la infraestructura tecnológica del tribunal supremo de justicia [

Universidad Rafael Bellosó Chacín,
2006

text (article)

Analítica

In the present investigation a situational analysis of the Technological infrastructure of the TSJ was settled down, specifically in the Executive Department of the Magistracy that carries out administrative functions; therefore, the purpose was to propose safe-deposit strategies for the technological infrastructure, the analysis of the computer audit was made taking in account the factors that determine the behaviour of the operative continuity and the controls of organizational security. The investigation is of field and documental type. Their design was not experimental and descriptive. The population was conformed by 168 users, with a sample of 105 users, for the gathering of data two instruments were applied (observation record and the questionnaire). An analysis of the results was made, concluding: that the factors that determine the operative continuity were in smaller perception, products of lacks appropriate controls and of administration. Also it is recommended to plan, analyze and implant norms, political and safe-deposit procedures for the registration of the system, access bill, identification and authentication
