

# Apertura Comercial y Desarrollo Económico: la incansable búsqueda de un lazo conductor [

2014

text (article)

Analítica

This paper studies the attempts to find a common link between trade liberalization and economic development. Previous research was reviewed and it is noted they have failed to find elements which allow to infer of a direct and significant relationship between the variables analyzed. Nevertheless, from different multilateral agencies recommendations are made assuming that such a relationship exists. In conclusion, trade policy should be seen as one element in an overall development strategy and not as a tool that by itself guarantees results independently
