

Aspectos Ergonômicos no Planejamento e Execução de Projetos: Estudo de Caso de um Centro de Distribuição de Produtos Têxteis [

2012

text (article)

Analítica

The planning and execution phases of a distribution center project of a large textile industry was made, evaluating the ergonomic aspects related to the operations to be performed in the facility and staff anthropometric data. The ergonomic collaborative analysis of the tasks associated with the method of movement plotting, guided the planning of the picking, manual induction and order consolidation areas from the distribution center. Using this methodology, it was possible to obtain a proper ergonomically project planning and execution of the three studied areas
