

Construcción de un MOOC para un Curso Cero de Matemáticas en Economía [

2014

text (article)

Analítica

Some of the authors of this work have been teaching a Basic Maths Course, which is aimed at new students since 2009/2010. It is held in the Faculty of Economy and Business from the University of Malaga. Currently the way to access our Faculty is mostly through the University Entrance Exam with students coming from different areas: Social Science, Science-Technology, Health Sciences and Art and Humanities) and from Polytechnic training courses. Due to this disparity among students and to the lack of basic training in mathematics of our students, the need arose for an introductory course to guide them on the basics that they will need in the different degrees of our Faculty. In one of the groups in the current course, this Basic Math Course has been taught virtually, using multimedia and interactive resources (educational videos, webinars, etc.). We have considered the response of both students and teachers, asking their opinion both at the end of Basic Math Course and at the end of the semester, in which they have had to use everything they have learned, to contrast its utility through surveys. We are preparing a MOOC (Massive Open Online Course), so that this content has a greater dissemination and outreach to other students who need such courses
