

Creencias irracionales prototípicas del trastorno de la personalidad por dependencia [

2013

text (article)

Analítica

The aim of this case-control study was to establish a prototypical irrational dependent personality disorder repertoire of beliefs, values and concepts in a group of 24 participants diagnosed with Bucaramanga (Colombia). Two groups were classified by Multiaxial Personality Inventory MCMI-III (Cardinal & Sanchez, 2007) and SCID II (Structured Clinical Interview for Personality Disorders Axis II DSM-IV (First, 1999). They structured individual interviews were evocative Questionnaire beliefs, concepts and values irrational (Ellis, 1993), to obtain 5 values, 12 and 15 concepts irrational beliefs characteristic of the disorder in the group of cases that were validated in a report Auto beliefs, concepts and irrational values of dependent personality disorder demonstrated 12 weeks after a $X^2 = 37,634$ that with $p \leq 0.001$ and $df = 23$, was lower than expected $X^2 = 49.728$
