

Del pasado romano al Pirî Reis: puertos y ciudades hispanas del Mediterráneo antiguo y medieval [

2013

text (article)

Analítica

Historic ports on the Mediterranean coast of the Iberian Peninsula are now ports and port cities inhabited and in operation. Unfortunately, we only have circumstantial and scarce archaeological information, restricted in the immediate vicinity of the port. However, we have the exceptional work/book of Piri Reis, in his edition of 1526 (the first edition of 1521 is less interesting), as it describes each and every one of the ports on the Mediterranean coast. Piri Reis -the Turkish admiral's work- describes in great detail many of the most important harbors and anchorages on the coast. Anyway, we do not use only the Piri Reis. To perform the study of Spanish ports, we use as the main tools archaeological findings and historical documentation of medieval archives. In this way, we will be able to understanding the evolution of a port as the key to understanding the anatomy of the coastal cities from Antiquity to the Middle Ages
