Analítica

Provides a gateway to selected drug information from the National Library of Medicine and other key government agencies. At the top of the page are links to individual resources with potential drug information, including summaries tailored to various audiences. Resources include the NLM search systems useful in searching for a drug, NLM research resources, resources organized by audience and class, and other NIH and government resources such as FDA and CDC. More than 12,000 drugs can be searched using this facility
