

Del Tratado INF al START. El final de los acuerdos de No-Proliferación Nuclear? [

2019

text (article)

Analítica

The Intermediate-Range Nuclear Forces (INF) Treaty was signed in 1987 between the former Soviet Union and the United States. Through this treaty, both states were committed to eliminate all land-based systems and cruise missiles, both conventional and nuclear, with ranges between 500 to 5,500 kilometres. However, the agreements reached at the end of the so-called Cold War are nowadays in a delicate situation, within a multipolar order, in the globalization context. After the allegations made both by US and Russia over noncompliance with their respective responsibilities, the INF Treaty is crossing a more than hazardous context, which could have negative consequences over other treaties related to the nuclear non-proliferation regime, such as the New Strategic Arms Reduction Treaty (New START) or the Nuclear Non-Proliferation Treaty (NPT) itself. With this uncertain future forthcoming, all actors are beginning to consider new strategies The Intermediate-Range Nuclear Forces (INF) Treaty was signed in 1987 between the former Soviet Union and the United States. Through this treaty, both states were committed to eliminate all land-based systems and cruise missiles, both conventional and nuclear, with ranges between 500 to 5,500 kilometres.
