

## The complete masterclass on PL-900 certification

Material Projectable

Set out on a comprehensive journey through our PL-900 certification course, which equips you with the knowledge you need to pass the PL-900 exam. This course offers over 15 hours of instructional content, 140 pages of study guides, and practice exams, ensuring that you have all the resources required for success. The course aligns closely with the PL-900 curriculum, following the 76 learning objectives defined by Microsoft. It's structured to enhance your chances of passing the exam by systematically addressing each learning objective in sequence, ensuring that you never feel lost. Start by familiarizing yourself with the PL-900 exam and the most effective strategies for success. Then, configure the Power Platform on your computer to prepare your learning environment. Throughout the course, you will dive into understanding the business value and core components of Microsoft Power Platform, master Power BI to create powerful reports and gain valuable insights, develop proficiency in Power Apps for crafting custom business applications, and gain in-depth knowledge of Power Automate to streamline business processes. Additionally, you will explore how to leverage the capabilities of Power Virtual Agents to create efficient chatbots. By the end of the course, you will be equipped to learn, demonstrate, and apply Power BI capabilities to build sophisticated reports. Join us on this empowering learning journey to unlock your full potential in the Microsoft Power Platform realm. What You Will Learn Learn everything required to pass the PL-900 exam and achieve the Power Platform Fundamentals certification Understand the core components and business value of Microsoft Power Platform Master Power BI capabilities for creating advanced reports and gaining valuable insights Learn Power Apps to design and build customized business applications Gain expertise in Power Automate for streamlined automation of everyday business processes Learn how to effectively communicate the significance of Microsoft Power Platform's core components Audience This course is designed to cater to a diverse range of learners, including students aiming to pass the PL-900 exam and earn the esteemed Microsoft Power Platform Fundamentals certification. Data analysts and business managers seeking insights into the Power Platform's capabilities will find this course invaluable. Additionally, individuals interested in mastering Power Apps, Power Automate, Power BI, Power Virtual Agents, Dataverse, Connectors, and AI Builder will benefit greatly. If you aspire to receive an official Microsoft certificate, or if you are looking for a comprehensive introduction to the Power Platform, this course caters to your learning needs. About The Author HHN Automate Book Inc.: Henry Habib is a seasoned manager at a leading management consulting firm.
