

Análisis de la planificación cuantitativa de los recursos humanos en el servicio de neonatología [

2023

text (article)

Analítica

Health constitutes a privilege for all countries, being an indispensable factor in human beings, not only favors their quality of life, but also guarantees the survival of the species. Resulting necessary to have the necessary amount of human resources to meet the needs of customers (patients and companions) in the service provided. The hospitals present different health services, in relation to the pediatric ones, they consider Neonatology a priority. The present investigation establishes as a general objective: to carry out an analysis of the quantitative planning of human resources in the Neonatology service. For this, the Nazur Borrás procedure (2023), phase II, was taken as a basis. Diagnosis, step 7, task 1. As a result of its application, the current diagnosis of the quantitative planning of human resources in the selected hospital health service is made. During its development, theoretical methods such as analysis-synthesis, inductive-deductive and historical-logical were used. In addition, empirical methods such as: documentary and bibliographic review, brainstorming, direct observations, questionnaires and interviews
