"An outstanding feature of Asian Economy and Finance: A Post-Crisis Perspective is that unlike most Asia-related books, it is written in a comprehensive and authoritative manner and covers large areas of Asian macro-economy and finance. The noteworthy areas of focus include global and intra-regional trade and investment, as well as financial and monetary aspects. In-depth discussions have been provided on regional integration through expanding trade, financial flows, regional production networks, financial and monetary co-operation. In taking a contemporary or post-crisis view of the Asian economy, this book offers the newest knowledge related to relevant themes on the Asian economics as well as the latest concepts. In a succinct manner, this book deals with the principal normative and positive strands with which one needs to be properly familiar in this subject area. This volume covers a great deal of ground and imparts knowledge on Asian economy related themes to students, researchers and policy makers alike."--Jacket
