Título: Multimedia Tools for Communicating Mathematics [Recurso electrónico] edited by Jonathan Borwein, Maria H. Morales, José F. Rodrigues, Konrad Polthier

Editorial: Berlin, Heidelberg Springer Berlin Heidelberg Imprint: Springer 2002

Descripción física: VIII, 314 p. online resource

Tipo Audiovisual: Mathematics Multimedia Information Systems Multimedia systems Software Engineering /Programming and Operating Systems Software engineering Visualization

Mención de serie: Mathematics and Visualization 1612-3786

Contenido: Computer Animated Mathematics Videotapes -- A Virtual Reconstruction of a Virtual Exhibit -- An Intuitive Approach to Elementary Mathematics on the Web -- Technology for Interactive Mathematical Documents -- The StageTools Package for Creating Geometry for the Web -- Communicating and Learning Mathematics with Hypervideo -- Collaboration in a Multimedia Laboratory -- jDvi - A Way to Put Interactive TeX on the Web -- Visual Calculus - Development and Tools -- EG-Models - A New Journal for Digital Geometry Models -- The Future of Mathematical Software -- A Dynamic Setup For Elementary Geometry -- Minimalistic Tools for Mathematical Multimedia -- Publication of Interactive Visualizations with JavaView -- The Solver Learning Environment for Solving Mathematical Word Problems: Pupils' Discussions -- Interactive Knot Theory with KnotPlot -- Developing Gato and CATBox with Python: Teaching graph algorithms through visualization and experimentation -- Rescalable Real-Time Interactive Computer Animations.-.

ISBN: 9783642562402

Autores: Morales, Maria H., editor Polthier, Konrad., editor Rodrigues, Jose Francisco, editor

Entidades: SpringerLink (Online service)

Punto acceso adicional serie-Título: Mathematics and Visualization 1612-3786
