

"La Peña del Moro", Navas de Oro, Segovia: poblamiento durante la Edad de Bronce en el Corredor Eresma-Pirón [

Glyphos Publicaciones,
2018

text (article)

Analítica

This article discusses a proposal about human occupation model during the Bronze Age in the northwestern area of the Province of Segovia, particularly in a small strip of territory within the Eresma - Pirón Corridor, where is located the archaeological site of La Peña del Moro, site detected in 2011 within a research project that aims to expand the level of knowledge about the populations settled there during the recent prehistory, particularly in the periods assigned to Protocogotas and Cogotas I cultures. A radiocarbon date and pottery research, suggests that the foundation of the settlement occurred during the Cogeces Horizon phase
