Analítica

ABSTRACT A good electric engineer should not only know and to be up-to-date of the new technologies, but rather he should know how that wonderful world of the technique was born effective today; the electric machines are the heart of the modern life, transformers, motors and electric generators, those that daily facilitate us the life filling each corner. it is objective to bring near to that luminous birth of the modern world where the electricity began to be everything for each human of this planet. In that birth of the electric power like part of each citizen's life day by day, and in the fact of being constituted an unit of measurement of the development of each country, the Exhibition of Paris went without place to doubts, a key factor. Starting from 1889 the man discovered the reality of living a dream: its borning the machines and electric driving

ABSTRACT A good electric engineer should not only know and to be up-to-date of the new technologies, but rather he should know how that wonderful world of the technique was born effective today; the electric machines are the heart of the modern life, transformers, motors and electric generators, those that daily facilitate us the life filling each corner. it is objective to bring near to that luminous birth of the modern world where the electricity began to be everything for each human of this planet. In that birth of the electric power like part of each citizen's life day by day, and in the fact of being constituted an unit of measurement of the development of each country, the Exhibition of Paris went without place to doubts, a key factor.
