Analítica

The recent social unrest that has been going through Chile for more than a decade poses as its central issue the demand for educational changes that overcome a system which rests primarily on market mechanisms and the weakening of public education, legacies of the civil-military dictatorship led by Augusto Pinochet (1973-1990). From this context, the purpose of this article (with some elements of an essay) is to provide a selection of historical junctures in which education is brought into dialogue with the foundations of the social pact and the changing notions of the social good that education provides
