

12th International Congress on Ericksonian Approaches to Psychotherapy. Generative therapy : using positive connections to create transformational change /

Gilligan, Stephen G. (1954-),
teacher

Instructional films.

Conference papers and proceedings.

Material Projectable

This demonstration will show how generative psychotherapy is organized around three positive connections: (1) a positive intention/goal, (2) a "felt sense" of somatic presence, and (3) positive resources. These positive connections provide a structural base around which a creative session, including generative trance work, may be unfolded to achieve therapeutic outcomes. Educational Objectives: 1. Explain how to identify positive intentions/goals, and resources. 2. Discuss how these positive connections may be the base for unfolding a therapeutic session
