Monografía

Networks of today are going through a rapid evolution and there are many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low power wireless communications along with silicon integration of various functionalities such as sensing, communications, intelligence and actuations are emerging as a critically important disruptive computer class based on a new platform, networking structure and interface that enable novel, low cost and high volume applications. Several of such applications have been difficult to realize because of many interconnections problems. To fulfill their large range of applications different kinds of networks need to collaborate and wired and next generation wireless systems should be integrated in order to develop high performance computing solutions to problems arising from the complexities of these networks. This volume covers the theory, design and applications of computer networks, distributed computing and information systems. The aim of the volume "Advanced Information Networking and Applications" is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications.

Título: Advanced Information Networking and Applications electronic resource] :] Proceedings of the 37th International Conference on Advanced Information Networking and Applications (AINA-2023), Volume 2 edited by Leonard Barolli.

Edición: 1st ed. 2023

Editorial: Cham Springer International Publishing Imprint: Springer 2023.

Descripción física: XXIX, 575 p. 216 illus., 175 illus. in color. online resource.

Mención de serie: Lecture Notes in Networks and Systems 2367-3389 654

Documento fuente: Springer Nature eBook

ISBN: 9783031284519 978-3-031-28451-9

Materia: Engineering>Data processing Computational intelligence Data Engineering Computational Intelligence

Autores: Barolli, Leonard., editor. edt. <http://id.loc.gov/vocabulary/relators/edt>

Entidades: SpringerLink (Online service)

Enlace a formato físico adicional: Printed edition 9783031284502 Printed edition 9783031284526

Punto acceso adicional serie-Título: Lecture Notes in Networks and Systems 2367-3389 654.
