History

Textbooks (form)

Monografía

This book contains papers by more than fifty scholars who elucidate the contribution of material as well as literary culture to our understanding of the Roman Empire. The emphasis is particularly upon the new and exciting links between the various sub-disciplines that make up Roman Studies - for example, between literature and epigraphy, art and philosophy, papyrology and economic history. Connections with disciplines outside classics are also explored, including anthropology, psychoanalysis, gender and reception studies, and the use of new media
