

Accesibilidad Digital para páginas web universitarias del Ecuador [

2023

text (article)

Analítica

The objective of this research is to analyze the web pages of ten universities in Ecuador, classified as the best in the Times Higher Education 2022 Ranking, and to verify that they do not have an adequate level of digital accessibility. A descriptive-conclusive methodology is employed and two web analytics tools are used: Lighthouse and Accessibility Checker. After performing a total of two analyzes, the first on March 31, 2023 with Lighthouse, and the second with Accessibility Checker on April 30, 2023, it is concluded that: (a) eight of the ten Ecuadorian institutions chosen for the study do not reach a percentage of accessibility approved by the standards established by the Web Accessibility Initiative (WAI), (b) the University of the Armed Forces (ESPE) and the Catholic University of Cuenca are the only institutions that, although they did not reach a score of 100%, their final results exempt them from legal problems for non-compliance with digital accessibility laws, according to international standards and (c) universities in Ecuador do not have sufficient information on digital accessibility, its importance and its implementation
