

## Catastro digital para la gestión de préstamos de materiales de construcción [

2018

text (article)

Analítica

Before of carry out any project on building of land structures, it is necessary to know the characteristics of the own soils and furthermore have your places of stances. For this reasons the present works will gives the preliminary ubicacion of loans and quarries to evaluate their reserves potentials that requires the projects necessitates. The required information of sources of construction materials is very broken in fragments and it disperse in the files of the units that are devoted to that task what hinders their insert in future projects. It is for it that this work presents the digital census of construction materials in the Pinar del Río county providing the preliminary information relative to loans located in the county with a geotechnical foundation of each one. The applied methodology was based in one group of all that information in a database elaborated by means of the Microsoft Excel 2010 tabulated in the system of geographical location (MapInfo 10.5), obtaining the space location of 162 points of loans as a result evidencing a prevalence in the municipality of Pinar del Río. We lend then fundamentally they corresponded to clay sandy, those that can be used in earth work, in road, channels, red ceramic industries and construction materials for different users
