

Con la seguridad en mente. Cultura de seguridad, trabajo social e intervención interdisciplinar en el ámbito sanitario [

2022

text (article)

Analítica

This work aims to reflect the philosophy that was contemplated in Law 7/2011, of the highest regulatory Rank on safety in the health field. With the denostratio on the nedd to bet and improve the safety of people in health systems. For this, the importance of Taxonomy and patient safety is shown, as well as the main conceptual models and safety culture. Likewise, it includes the importance of risk managment and prevention,wiht the need to work through management models base don the health system. Theyalso demand a renewal of agreements, greater training for health and non-health workforce, families and patients. It is important if curent concepts are taken into account, the introduction of modern cumputer sustems and changes produced by innovation and new technologies (NNTT), with the appearance of new diseases and constant social transformations, which have to be given response
