Título: Using Stable Diffusion with Python Leverage Python to Control and Automate High-Quality AI Image Generation Using Stable Diffusion

Edición: 1st ed

Editorial: Birmingham Packt Publishing, Limited 2024 2024

Descripción física: 1 online resource (352 pages)

Contenido: Intro -- Title Page -- Copyright and Credits -- Dedication -- Foreword -- Contributors -- Table of Contents -- Preface -- Part 1 - A Whirlwind of Stable Diffusion -- Chapter 1: Introducing Stable Diffusion -- Evolution of the Diffusion model -- Before Transformer and Attention -- Transformer transforms machine learning -- CLIP from OpenAI makes a big difference -- Generate images -- DALL-E 2 and Stable Diffusion -- Why Stable Diffusion -- Which Stable Diffusion to use -- Why this book -- References -- Chapter 2: Setting Up the Environment for Stable Diffusion -- Hardware requirements to run Stable Diffusion -- GPU -- System memory -- Storage -- Software requirements -- CUDA installation -- Installing Python for Windows, Linux, and macOS -- Installing PyTorch -- Running a Stable Diffusion pipeline -- Using Google Colaboratory -- Using Google Colab to run a Stable Diffusion pipeline -- Summary -- References -- Chapter 3: Generating Images Using Stable Diffusion -- Logging in to Hugging Face -- Generating an image -- Generation seed -- Sampling scheduler -- Changing a model -- Guidance scale -- Summary -- References -- Chapter 4: Understanding the Theory Behind Diffusion Models -- Understanding the image-to-noise process -- A more efficient forward diffusion process -- The noise-to-image training process -- The noise-to-image sampling process -- Understanding Classifier Guidance denoising -- Summary -- References -- Chapter 5: Understanding How Stable Diffusion Works -- Stable Diffusion in latent space -- Generating latent vectors using diffusers -- Generating text embeddings using CLIP -- Initializing time step embeddings -- Initializing the Stable Diffusion UNet -- Implementing a text-to-image Stable Diffusion inference pipeline -- Implementing a text-guided image-to-image Stable Diffusion inference pipeline -- Summary -- References Additional reading -- Chapter 6: Using Stable Diffusion Models -- Technical requirements -- Loading

the Diffusers model -- Loading model checkpoints from safetensors and ckpt files -- Using ckpt and safetensors files with Diffusers -- Turning off the model safety checker -- Converting the checkpoint model file to the Diffusers format -- Using Stable Diffusion XL -- Summary -- References -- Part 2 - Improving Diffusers with Custom Features -- Chapter 7: Optimizing Performance and VRAM Usage -- Setting the baseline -- Optimization solution 1 - using the float16 or bfloat16 data type -- Optimization solution 2 - enabling VAE tiling -- Optimization solution 3 - enabling Xformers or using PyTorch 2.0 -- Optimization solution 4 - enabling sequential CPU offload -- Optimization solution 5 - enabling model CPU offload -- Optimization solution 6 - Token Merging (ToMe) -- Summary -- References -- Chapter 8: Using Community-Shared LoRAs -- Technical requirements -- How does LoRA work? -- Using LoRA with Diffusers -- Applying a LoRA weight during loading -- Diving into the internal structure of LoRA -- Finding the A and B weight matrix from the LoRA file -- Finding the corresponding checkpoint model layer name -- Updating the checkpoint model weights -- Making a function to load LoRA -- Why LoRA works -- Summary -- References -- Chapter 9: Using Textual Inversion -- Diffusers inference using TI -- How TI works -- Building a custom TI loader -- TI in the pt file format -- TI in bin file format -- Detailed steps to build a TI loader -- Putting all of the code together -- Summary -- References -- Chapter 10: Overcoming 77-Token Limitations and Enabling Prompt Weighting -- Understanding the 77-token limitation -- Overcoming the 77-tokens limitation -- Putting all the code together into a function -- Enabling long prompts with weighting -- Verifying the work Overcoming the 77-token limitation using community pipelines -- Summary -- References -- Chapter 11: Image Restore and Super-Resolution -- Understanding the terminologies -- Upscaling images using Img2img diffusion -- One-step super-resolution -- Multiple-step super-resolution -- A super-resolution result comparison -- Img-to-Img limitations -- ControlNet Tile image upscaling -- Steps to use ControlNet Tile to upscale an image -- The ControlNet Tile upscaling result -- Additional ControlNet Tile upscaling samples -- Summary -- References -- Chapter 12: Scheduled Prompt Parsing -- Technical requirements -- Using the Compel package -- Building a custom scheduled prompt pipeline -- A scheduled prompt parser -- Filling in the missing steps -- A Stable Diffusion pipeline supporting scheduled prompts -- Summary -- References -- Part 3 - Advanced Topics -- Chapter 13: Generating Images with ControlNet -- What is ControlNet and how is it different? -- Usage of ControlNet -- Using multiple ControlNets in one pipeline -- How ControlNet works -- Further usage -- More ControlNets with SD -- SDXL ControlNets -- Summary -- References -- Chapter 14: Generating Video Using Stable Diffusion -- Technical requirements -- The principles of text-to-video generation -- Practical applications of AnimateDiff -- Utilizing Motion LoRA to control animation motion -- Summary -- References -- Chapter 15: Generating Image Descriptions Using BLIP-2 and LLaVA -- Technical requirements -- BLIP-2 - Bootstrapping Language-Image Pre-training -- How BLIP-2 works -- Using BLIP-2 to generate descriptions -- LLaVA - Large Language and Vision Assistant -- How LLaVA works -- Installing LLaVA -- Using LLaVA to generate image descriptions -- Summary -- References -- Chapter 16: Exploring Stable Diffusion XL -- What's new in SDXL? -- The VAE of the SDXL -- The UNet of SDXL Two text encoders in SDXL -- The two-stage design -- Using SDXL -- Use SDXL community models -- Using SDXL image-to-image to enhance an image -- Using SDXL LoRA models -- Using SDXL with an unlimited prompt -- Summary -- References -- Chapter 17: Building Optimized Prompts for Stable Diffusion -- What makes a good prompt? -- Be clear and specific -- Be descriptive -- Using consistent terminology -- Reference artworks and styles -- Incorporate negative prompts -- Iterate and refine -- Using LLMs to generate better prompts -- Summary -- References -- Part 4 - Building Stable Diffusion into an Application -- Chapter 18: Applications - Object Editing and Style Transferring -- Editing images using Stable Diffusion -- Replacing image background content -- Removing the image background -- Object and style transferring -- Loading up a Stable Diffusion pipeline with IP-Adapter -- Transferring style -- Summary -- References -- Chapter 19: Generation Data Persistence -- Exploring and understanding the PNG file structure -- Saving extra text data in a PNG image file -- PNG extra data storage limitation -- Summary -- References -- Chapter 20: Creating Interactive User Interfaces -- Introducing Gradio -- Getting started with Gradio -- Gradio fundamentals -- Gradio Blocks -- Inputs and outputs -- Building a progress bar -- Building a Stable Diffusion text-to-image pipeline with Gradio -- Summary -- References -- Chapter 21: Diffusion Model Transfer Learning -- Technical requirements -- Training a neural network model with PyTorch -- Preparing the training data -- Preparing for training -- Training a model -- Training a model with Hugging Face's Accelerate -- Applying Hugging Face's Accelerate -- Putting code together -- Training a model with multiple GPUs using Accelerate -- Training a Stable Diffusion V1.5 LoRA -- Defining training hyperparameters Preparing the Stable Diffusion components -- Loading the training data -- Defining the training components -- Training a Stable Diffusion V1.5 LoRA -- Kicking off the training -- Verifying the result -- Summary -- References -- Chapter 22: Exploring Beyond Stable Diffusion -- What sets this AI wave apart -- The enduring value of mathematics and

programming -- Staying current with AI innovations -- Cultivating responsible, ethical, private, and secure AI --
Our evolving relationship with AI -- Summary -- References -- Index -- Other Books You May Enjoy
