

'España 2050': Apuesta por el Green New Deal en la prospectiva del Gobierno español [

2022

text (article)

Analítica

The España 2050 report contains the keylines of the Government's foresight for the next three decades. Spain, like most countries, bets all the possibilities of the ecological transition on the decarbonization of the economy in a context of growth, so that its perspective is eco-Keynesianism. For that reason, this article analyzes, on the one hand, the political, social, and economic viability of the ecological transition and, on the other hand, its sufficiency to face the climate crisis based on criticism, with special attention to degrowth. España 2050 addresses the climate crisis from a scenario that is becoming hegemonic, that of the Green New Deal
