

## 'Ideas, o movimientos en el cerebro': El debate Joseph Priestley - Thomas Reid acerca del materialismo psicológico [

2023

text (article)

Analítica

In the second half of the 18th century, Thomas Reid and Joseph Priestley debated on the nature of mind and its interaction with body. Within the framework of the defence of Christian religion and in the name of experimentalist and Newtonian methodological principles, the authors argue for completely different proposals about the interaction between mind and matter. Their divergences are rooted in their interpretation of the Newtonian method and their conceptions of matter. These different points of view result in two attitudes: a dualist, more conservative one on the part of Reid and a materialist, heterodox and innovative one on the part of Priestley
