Conference papers and proceedings

Monografía

This is the second volume of a collection of articles dedicated to V.G Maz'ya on the occasion of his 60th birthday. It contains most of the invited lectures of the Conference on Functional Analysis, Partial Differential Equations and Applications held in Rostock in September 1998 in honor of V.G Maz'ya. Here different problems of functional analysis, potential theory, linear and nonlinear partial differential equations, theory of function spaces and numerical analysis are treated. The authors, who are outstanding experts in these fields, present surveys as well as new results. The first volume contains surveys on his work in different fields of mathematics or on areas to which he made essential contributions. Other articles of this book have their origin in the common work with Maz'ya. V.G Maz'ya is author or co-author of more than 300 scientific works on various fields of functional analysis, function theory, numerical analysis, partial differential equations and their application. The reviews in this book show his enormous productivity and the large variety of his work

**Título:** The Maz'ya Anniversary Collection. Volume 2 Rostock Conference on Functional Analysis, Partial Differential Equations and Applications [electronic resource] edited by Jürgen Rossmann, Peter Takác, Günther Wildenhain

**Editorial:** Basel Birkhäuser Basel Imprint Birkhäuser 1999

**Descripción física:** 1 online resource (352 pages)

**Variantes del título:** Mazaya Anniversary Collection, Volume 2

**Mención de serie:** Operator Theory: Advances and Applications 110

**Documento fuente:** Springer eBooks

**Bibliografía:** Includes bibliographical references

**Contenido:** The biharmonic obstacle problem with varying obstacles and a related maximal operator -- Maximum and antimaximum principles for some systems involving Schrödinger operators -- Coupling of finite and boundary element methods for the time-harmonic Maxwell equations -- Perturbation of trajectory attractors for dissipative hyperbolic equations -- A review of Hardy inequalities -- Solutions of a class of semilinear differential equations: trace and singularities on the boundary -- Eigenfrequencies of fractal drums -- Approximate identities and stability of discrete convolution operators with flip -- The Dirac equation without spinors -- On symmetry and asymmetry of positive solutions of  $\Delta u + f(u) = 0$  where  $f$  is discontinuous -- Hybrid methods for boundary value problems via boundary energy -- Discreteness of spectrum for the Schrödinger operators on manifolds of bounded geometry -- On the Lieb-Thirring conjecture for a class of potentials -- New results on wave diffraction by canonical obstacles -- Generalized Lucas polynomials matrix theory, and zero's distribution of orthogonal polynomials -- Lower bounds for the generalized counting function -- Pointwise multipliers of Lizorkin-Triebel spaces -- Nonlinear potentials and trace inequalities -- A remark on Hardy type inequalities for critical Schrödinger operators with magnetic fields

**Restricciones de acceso:** Online full text is restricted to subscribers

**Formato físico adicional:** Also available in print

**Detalles del sistema:** Mode of access: World Wide Web

**Lengua:** English

**Copyright/Depósito Legal:** 840290623 1086512487 1113721867 1256672478 1264478324 1328707398

**ISBN:** 9783034886727 electronic bk.) 3034886721 electronic bk.) 9783034897259 3034897251 9783764362027 e-book)

**Materia:** Mathematics Functional analysis- Congresses Mathematical analysis- Congresses Differential operators- Congresses Differential equations, Partial- Congresses Mathématiques Analyse fonctionnelle- Congrès Analyse mathématique- Congrès Opérateurs différentiels- Congrès Équations aux dérivées partielles- Congrès applied mathematics mathematics Matemáticas Análisis matemático Análisis funcional Ecuaciones en derivadas parciales Operadores diferenciales Mathematical analysis Functional analysis Differential operators Differential equations, Partial Mathematics
