

Investigación Educativa en Organizaciones Complejas

Lucena Martínez, Raúl

Monografía

This book explores the multifaceted nature of educational research in complex environments, focusing on the future of education and pedagogical innovations. It addresses a wide range of topics including digital competencies, inclusive methodologies, and the integration of technology in education, such as the use of ChatGPT and immersive technology. The authors aim to provide insights into the challenges and opportunities presented by the rapid advancement of technology, cultural diversity, and the political and economic influences on educational agendas. The book targets educators, policymakers, and researchers interested in developing effective educational practices and fostering inclusive learning environments.
