

Abordagens, conceitos e propostas para a gestão integrada dos resíduos sólidos urbanos na literatura científica [

2018

text (article)

Analítica

Questions related to the lack access of water and sanitation are important in Brazil. The 2016 Brotherhood Campaign concerns basic sanitary service. Its theme is: "Common home, our responsibility"" and encourages the community to convert and change its lifestyle. We can't ignore that technology is changing our lives, some forms of scientific innovations have modified our lives entirely. But, on the other hand, our activities have modified almost every part of our environment. This paper aims to identify, interpret, and summarise the literature currently available on the integrated solid waste management based in the Brazilian Solid Waste Policy. A retrospective review was undertaken through the three spheres participation in sanitation policies: government, business and population. It was concluded that today in Brazil the integrated solid waste actions occur in an isolated way
