

# Alimentación en el neolítico

[

Editorial Grupo AEA,  
2023

[text \(article\)](#)

Analítica

The Neolithic period is characterized by the domestication of animals, socialization, the appearance of ceramics and the progress of this population with respect to cooking, the use of plants and their diet. With the creation of ceramic vessels, the way of eating and cooking changes, food is prepared in these vessels, using the cooking method instead of roasting. The instruments made with ceramics were used to store and preserve food in a more select way
