Monografía

This is a unique collection of leading examples of education grounded in alternative philosophies and cultures - from initiatives to create more democratic schools, through Quaker, Buddhist, Islamic, Montessori and Steiner /Waldorf schools, to Maori and First Nations education in Canada and Palestinian Jewish schools in Israel. Aimed at educational practitioners, leaders, and policy-makers in all types of educational settings, as well as academics and researchers, the book is a resource to help educators think creatively about education at a time when the need to find new ways to nurture spiritual and holistic growth and democratic citizenship has never been greater
