Monografía

"She was the Galactic Coalition's top recruit until an incident on her final exam had her drummed out of the service. Now, down and out and looking for another shot at her dream, Astrid receives a special mission from her former commander. Alongside her old classmate Ulf, Astrid will have to survive giant insects, brutal sects, and the ancient evil of an uncharted volcanic moon if she wants to prove herself worthy of another chance at becoming a Galactic Peacekeeper!"--
