

Advances in wind energy and conversion technology /

Mathew, Sathyajith
Philip, Geeta Susan

Springer,
2011

Monografía

As a result of intensive research and developmental efforts, the technology of generating energy from wind has changed significantly in the past five years. This book brings together all the latest aspects of wind energy conversion technology

Título: Advances in wind energy and conversion technology edited by Sathyajith Mathew, Geeta Susan Philip

Editorial: Berlin London Springer 2011

Descripción física: 1 online resource

Tipo Audiovisual: milieu environment natuurbescherming nature conservation milieubeheer environmental management luchtverontreiniging air pollution verontreinigingsbeheersing pollution control klimaatverandering climatic change Environmental Sciences (General) Milieuwetenschappen (algemeen)

Mención de serie: Environmental science and engineering. Environmental science

Bibliografía: Includes bibliographical references and index

Contenido: Advances in Wind Energy Conversion Technology; Preface; Contents; 1 Aerodynamics of Horizontal Axis Wind Turbines; 2 Analysis of Wind Regimes and Performance of Wind Turbines; 3 Advances in Offshore Wind Resource Estimation; 4 Short Term Forecast of Wind Power; 5 Analysis of Wind Turbine Loads; 6 Power Regulation Strategies for Wind Turbines; 7 Grid Integration of Offshore Wind Farms; 8 Small Wind Turbines; Index

Lengua: English
