2006

Congress Conference papers and proceedings. Conference papers and proceedings. Actes de congrès.

Monografía

As a constructive simulation method, Agent-Based Computational Economics (ACE) has proven its strength and applicability. Based on communications given at the second symposium on Artificial Economics, this book covers both well-known questions of economics, like the existence of market efficiency, as well as questions raised by new tools

Título: Advances in artificial economics the economy as a complex dynamic system Charlotte Bruun (ed.).

Editorial: Berlin Springer 2006

Descripción física: 1 online resource (xv, 294 pages) illustrations

Tipo Audiovisual: Artificial economics AE

Mención de serie: Lecture notes in economics and mathematical systems 584

Bibliografía: Includes bibliographical references

Contenido: Heterogeneous beliefs under different market architectures / Mikhail Anufriev, Valentyn Panchenko -- The allocative effectiveness of market protocols under intelligent trading / Marco LiCalzi, Paolo Pellizzari -- Strategic behaviour in continuous double auction / Marta Posada, Cesáreo Hernández, Adolfo López-Paredes -- A broad-spectrum computational approach for market efficiency / Olivier Brandoy, Philippe Mathieu -- The dynamics of quote prices in an artificial financial market with learning effects / Andrea Consiglio, Valerio Lacagnina, Annalisa Russino -- Reduction of the bullwhip effect in supply chains through speculation / Thierry Moyaux, Peter McBurney -- Co-evolutionary market dynamics in a peaked resource space / César García-Díaz, Arjen van Witteloostuijn -- E-consumers' search and emerging structure of web-sites coalitions / Jacques Laye [and others] -- Agent based modeling of trust between firms in markets / Alexander Gorobets, Bart Nooteboom -- Investigations into Schumpeterian economic behaviour using swarm / Craig Lynch -- The wisdom of networked evolving agents / Akira Namatame -- Artificial multi-agent stock markets : simple strategies, complex outcomes / A.O.I Hoffmann [and others] -- Market polarization in presence of individual choice volatility / Sitabhra Sinha, Srinivas

Raghavendra -- Is ignoring public information best policy? Reinforcement learning in information cascade / Toshiji Kawagoe, Shinichi Sasaki -- Complex behaviours in binary choice model with global or local social influence / Denis Phan, Stéphane Pajot -- Dynamics of a public investment game : from nearest-neighbor lattices to small-world networks / Roberto da Silva [and others] -- Social norms, cognitive dissonance and broadcasting : how to influence economic agents / Andrew Bertie, Susan Himmelweit, Andrew Trigg -- Confronting agent-based models with data methodological issues and open problems / Giorgio Fagiolo, Alessio Moneta, Paul Windrum -- Equilibrium return and agents' survival in a multiperiod asset market : analytic support of a simulation model / Mikhail Anufriev, Pietro Dindo -- Explaining the statistical features of the Spanish stock market from the bottom-up / José A. Pascual, J. Pajares, A. López-Paredes
