Monografía

"This exciting volume brings together a wide range of perspectives on one of the most important and challenging areas of modern theology. There are entries on all the major themes of Christian feminist theology, including models of God and of the Church, ethics and spirituality, sexuality and liberation. Many of the entries push their respective discussions beyond the rigid boundaries of previous theological discourse. Together they present the far-reaching concerns of feminist theology in an accessible and stimulating way. The compendium is both a resource and an inspiration for scholars and students of feminist theology and for all those who are interested in this field of reflection and activity."--Bloomsbury Publishing
