

Análisis de la evaluación de autopsia psicológica suscitada en los delitos de femicidio en la localidad de Tungurahua postpandemia [

2022

text (article)

Analítica

The figure of femicide has been exposed more frequently in Latin American countries where the highest rate occurs in countries such as Bolivia, Brazil, Colombia, Ecuador, El Salvador, Honduras, Dominican Republic, among other nations, due to this factor The legal regulations had to be restructured and make significant changes to address the criminal investigation in the Medico-Legal practice of the autopsy in cases of femicide. That is why the norm is currently becoming more rigorous, with the sole purpose of avoiding and correctly punishing the conduct that is appropriate to violent acts committed against women. The purpose of outlining and developing this research is to determine the probative value of the psychological autopsy in the investigation process in the crimes of murder of women. The probative value of the psychological autopsy is based on the "status quo" (state of origin), that is, the factors that promote a fact or event are analyzed; In this case, it is framed to the acts that prevail in the investigation regarding murders of women within Ecuadorian society. Within this work, important information was collected based on the subject of the psychological autopsy, although what is intended is to analyze the events that occurred in the life of the victim, which will be taken as evidence to demonstrate that the crime of Femicide is for this reason that the psychological autopsy was analyzed in a general way and this allowed a comparative legal analysis of the issue raised for the development of this article
