Analítica

In this article we try to expose some of the main issues elaborated in Anti-Oedipus, to emphasize their relevance for the understanding of a new political philosophy. To do so, we focus on three articulated aspects that are present in the book, but that become clearer for our current time when we put them in contact with some of the discussions they have raised and with the Deleuzian-Guattarian corpus. These aspects are: 1) the understanding of desire, subjected to a transformation based on the concept of "machine", 2) the analysis of capitalism, starting from the theorization of a specific socius, where desire acquires a singular treatment, and 3) the discovery of a molecular fascism, which will be openly developed in later texts by both authors
