Analítica

Roman culture has always been a culture that has aroused enormous interest in the history-loving population. The important works on Roman architecture or referring to the numismatics of the period are known. In the following pages we discuss a topic that is not so well known, although in recent years its knowledge has increased considerably. It is about superstition, magic, and the protective elements used by a superstitious society, such as the fascinum or the fig, and their persistence in current times
