Analítica

"The Fortunoff Archive currently holds more than 4,400 testimonies, which are comprised of over 12,000 recorded hours of videotape. Testimonies were produced in cooperation with thirty-six affiliated projects across North America, South America, Europe, and Israel, and each project maintains a duplicate collection of locally recorded videotapes. The Fortunoff Archive and its affiliates recorded the testimonies of willing individuals with first-hand experience of the Nazi persecutions, including those who were in hiding, survivors, bystanders, resisters, and liberators. Testimonies were recorded in whatever language the witness preferred, and range in length from 30 minutes to over 40 hours (recorded over several sessions)"--'About Us, ' 'Our Story, ' 'Testimonies, ' viewed March 10, 2021
