

La batalla de Little Big Horn o el canto del cisne de los Pieleros Rojos [

2024

text (article)

Analítica

On June 25, 1876, in the imposing prairies of Montana, the decisive battle of Little Big Horn took place, in which the forces of the U.S. Army and in particular, the Seventh Cavalry Regiment, faced the brave redskin warriors. The Union soldiers were commanded by Lieutenant Colonel George A. Custer, while the Indians were led by Crazy Horse and Sitting Bull. The events that took place are an account of a massacre, in which all of Custer's men, including himself, lost their lives. We review here, this specific battle, in the context of the so-called Indian Wars, developed after the Civil War in the United States. Promoted by the American governments, after 1865, these had the objective of reducing the natives, who inhabited the great prairies of the country, thus hindering the progress of the nation and in particular, the union of the territory between the east and west coasts. The battle of Little Big Horn, implies in our opinion, two fundamental questions for the later development of the confrontations, between the American army and the Indian forces. On the one hand, it meant the greatest triumph of the redskins, resulting in a massacre over the white enemy. On the other hand, the battle of Little Big Horn represents the beginning of the end of the Indian resistance, which ends with the reduction of these peoples, in a process of systematic and progressive annihilation
