Analítica

The Theory of Law provides analytical tools and principles through which both legal norms and their application in court can be analyzed. In this essay, a sentence analysis is made from the point of view of the different methods of legal interpretation and their scope, to resolve a particularly complex problem such as the unconstitutionality of a constitutional norm, determined in light of an advisory opinion of the IACHR of which Ecuador was not a consulting State, and of an extensive interpretation of constitutional principles and rights that entailed a mutation of the current text, thereby exceeding the jurisdiction of the Constitutional Court of Ecuador (CCE)
