Título: Structural analysis of historical constructions II. Possibilities of numerical and experimental techniques
Edited by P. Roca ... [etc.].

Editorial: Barcelona International Center for Numerical Methods in Engineering D. L. 1998

Descripción física: v

Mención de serie: Theory and engineering applications of computational methods

Nota general: Es el v. 2

Copyright/Depósito Legal: B 98-35994

ISBN: 84-89925-26-7

Materia: Edificios históricos- Conservación

Autores: Roca, P., ed. lit

Entidades: International Center for Numerical Methods in Engineering (CIMNE)

Punto acceso adicional serie-Título: Theory and engineering applications of computational methods
