

Russian contributions to game theory and equilibrium theory

/

Driessen, Theo (1957-)

Springer, 2006

Monografía

The research of Soviet scientists within the field of game theory has resulted in many high-level publications. This book aims to report about the research by Russian game theorists during the two decades 1968 - 1988 to the international readership. It contains a collection of contributions in game theory and the field of equilibrium theory
