Monografía

"A former field agent for M16, Michael Jones was the first surviving victim of the Desolation Test, a radically dangerous procedure cooked up by the British government. Jones was intravenously kept alive while being force-fed a steady diet of horrific data and images non-stop as stimulants were continuously pumped into his body--keeping him conscious and alert for a solid year. Now retired from the agency, Jones lives in Los Angeles, acting as a private investigator to the secret underground community of ex-spooks who have come in from the cold, and who have no one else to turn to."--Page 4 of cover
