**Título:** Solving polynomial equations foundations, algorithms, and applications [edited by] Alicia Dickenstein, Ioannis Z. Emiris

**Editorial:** New York, NY Springer 2005

**Descripción física:** XIII, 424 p. 24 cm

**Mención de serie:** Algorithms and computation in mathematics 14

**Bibliografía:** Contiene bibliografía e índice analítico

**Contenido:** Índice abreviado: 1. Introduction to residues and resultants 2. Solving equations via algebras 3. Symbolic-numeric methods for solving polynomial equations and applications 3. An algebraist's view on border bases 5. Tools for computing primary decompositions and applications to ideals associated to Bayesian networks 6. Algorithms and their complexities 7. Toric resultants and applications to geometric modelling 8. Introduction to numerical algebraic geometry 9. Four lectures on polynomial absolute factorization

**ISBN:** 978-3-540-24326-7 3540243267 alk. paper)

**Materia:** Ecuaciones- Soluciones numéricas Polinomios Equations- Numerical solutions Polynomials

**Autores:** Dickenstein, Alicia, ed. lit Emiris, Ioannis Z., ed. lit
