

Rgimen juridico de los gasoductos e hidroductos internacionales en la Unin Europea y en Espaa

Guayo Castiella, igo del

MARCIAL PONS, EDICIONES JURDICAS Y SOCIALES

Monografía

This book, authored by igo del Guayo, provides a comprehensive legal analysis of the regulatory framework governing gas pipelines and hydrogen pipelines within the European Union and Spain. It explores the significance of natural gas and hydrogen in the European energy sector, addressing the creation of an internal gas market and the development of strategic trans-European energy networks. The book discusses the legislative evolution from EU directives and regulations affecting pipeline access and capacity management to the impact of geopolitical events on regulations, such as the Nord Stream 2 project. It also examines the role of hydrogen in future energy strategies, with a focus on green hydrogen corridors like the H2MED project. The text aims to inform policymakers, legal professionals, and academics interested in energy law and infrastructure, highlighting Spain's legal adaptations and contributions to the EU's energy objectives.
